

## Municipal Sports Board

PALENCIA

In mid-2013, the Municipal Sports Board of Palencia awarded Clece the contract to manage energy efficiency in 16 sports facilities, including two covered swimming pools.

By replacing the generator sets, and by incorporating solar energy systems, installing LED lights in street lamps, improving the lighting systems on general, and by optimising timings and set points, energy consumption has been reduced by 22 percent. And to check the savings made, a measuring and verification plan has been implemented (IPMVP).
