

Hospital São João in Oporto

OPORTO, PORTUGAL

The health sector is one of the areas with greatest potential for growth in Portugal. Clece secured the contract to provide cleaning services for the facilities of Hospital São João in Oporto, one of the country's main hospitals. Optimising costs with more austere budgets without affecting any quality indicators was a challenge that Clece tackled with great success.

Reorganising the cleaning team, introducing machinery and incorporating appropriate cleaning solutions, such as the pre-impregnated mop system, were the main actions carried out by Clece to achieve the objectives set.
