

## Residential centre for homeless people in Barcelona.

### SOCIAL SERVICES

SECTOR:

SOCIAL AND HEALTH CARE

When Clece won the contract in 2015 for the homeless people's centre, it took on the challenge of incorporating the greatest possible number of socially excluded people within the workplace. To do this, it proposed collaborating with the work placement departments of different social entities.

Between 2014 and 2015, an inclusion program was implemented with 250 participants, of which, 39 found work, 12 of whom were integrated within Clece itself.
